## Modification of Ignition Key Switch!

### NOTE!

If the key switch is being used, find the white wire from the ignition switch. This wire ends up in a split.

Cut the white wire between the ignition switch and the split. A good rule is to cut it about 20mm from the ignition switch, then it is possible to repair it later. Isolate both of the loose wire ends.

Cut here, so that you dont need to set key switch in on to start from CoastKey.
