Suzuki Ignition Key Switch Modification

Key switch with two green wires

Figure 1

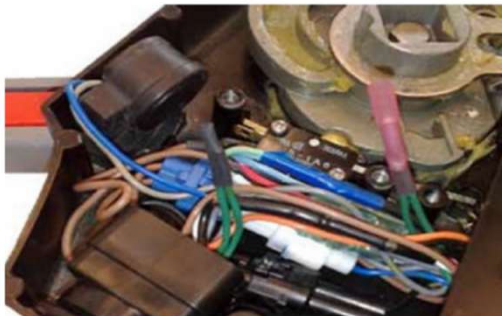

Figure 2

Key switch with one green wire

NOTE!

If the key switch is being used, find the green wire(s) from the ignition switch. It is either one green that ends in a split or two green wires.

One green wire:

Cut this between key switch and the split. Isolate the ends.

Two green wires:

Cut both of these, 3 cm from the key switch (fig.1). Splice the two ends together that go to the engine. Isolate or splice the two ends that go into the key switch (fig.2).
